

Project #2 - Interactive Typography - Part 1

Lily Vosari

Words:

- Jelly
 - <https://editor.p5js.org/lilyrose1013/sketches/lhh671JlZ>
 - Pink version that will grow and shrink creating a breathing effect; to show the reflection of how jelly/jell-o moves
 - <https://editor.p5js.org/lilyrose1013/sketches/LoKFLUOug>
 - Blue and green version where the word(text to point) is stagnantly moving and when the user mover there cursor over and clicks the whole word “jiggles” as a faster rate
 - <https://editor.p5js.org/lilyrose1013/sketches/A7F0Vc2qU>
 - Small text to points, with the word in lowercase to differentiate from the pervious 2 which are based in uppercase (ended up changing this in my finalized version
- Puffy
 - <https://editor.p5js.org/lilyrose1013/sketches/fHmMLxAX5>
 - Text to point version of the word puffy which I intend to grow when the user clicks the screen to lead to a end result resembling a cloud shape
 - Font used in final
 - `loadFont("https://cdnjs.cloudflare.com/ajax/libs/fontsource-roboto/4.5.3/files/roboto-latin-400-normal.woff");`
- Flash
 - https://editor.p5js.org/lilyrose1013/sketches/eN_-vvtET
 - The intention for this version is to create a flashing effect along with incorporating a strong effect and various colors.
 - Along with user intervention to aid is a more connective experience
 - Font used
 - <https://cdnjs.cloudflare.com/ajax/libs/fontsource-roboto/4.5.3/files/roboto-latin-400-normal.woff>
 - <https://editor.p5js.org/lilyrose1013/sketches/EVDmz400K>
